

Installation Instructions

CE-602-08

The CE-602-08 regulator is designed for use on 2008 and later Dyna models.

Remove Old Regulator

- 1) Remove the two-¼ 20 cap head screws that hold the regulator on.
- 3) Lift the regulator out and tilt it forward to access the wire connections.
- 3) Remove the locking clips and disconnect the stator and battery plugs.

Install New Regulator

- 1) Remove the retaining clips from the stator and battery connectors on the new regulator. Save them for reassembly.
- 2) Connect the stator and battery plugs.
- 3) Install one plug-retaining clip on each plug.
- 4) Bolt the regulator in place using the stock cap head screws.
- 6) Start the motor and check battery voltage. Battery voltage should run 14.4 to 14.6 volts.

Have A Good Ride!!
