Items Supplied >

- 1 FRONT HEADPIPE W/ HEATSHIELD
- 1 REAR HEADPIPE/COLLECTOR W/ HEATSHIELD
- 1 COLLECTOR HEATSHIELD
- 1 MUFFLER ASSEMBLY
- 1 BRACKET, EXHAUST MOUNT
- 5 CLAMP, HS-24 (SMALL)
- 1 CLAMP, HS-28 (LARGE)
- 1 CLAMP, 27-61MSC 1 CLAMP, 268-65MSC
- 2 BOLT, 5/16" X 1/2" FLANGE W/ LOCK PATCH
- 1 SPACER, .750"O.D. X .343"I.D. X .550"L BLACK
- 2 SPACER, ALUMINUM .550"O.D. X .344"I.D. X .170"L

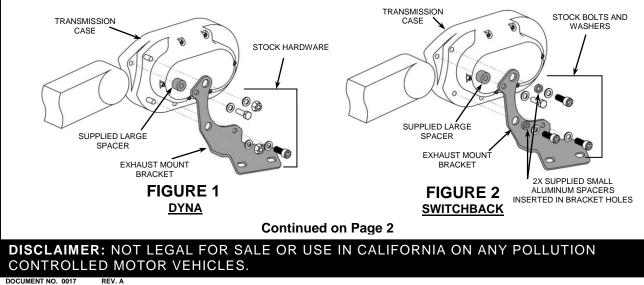

Application(s) >

SWITCHBACK

HARLEY: DYNA

12-17 12-16

- Page 1 of 3 Instruction Manual > 6477B PRIOR TO INSTALLATION, MAKE SURE YOUR STOCK HEAD PIPE GASKETS ARE IN GOOD CONDITION. IF YOU HAVE ANY DOUBTS AS TO THEIR CONDITION, REPLACE THEM. Read all instructions carefully and completely before installing your new exhaust system!
- 1. Apply masking tape to any surrounding parts to protect them from getting scratched.
- 2. For Switchback models, the right side floorboard will need to be removed from the mounts. Also remove the forward mount bolt and loosen the rearward mount bolt so the mount will swing out of the way for clearance.
- 3. Unplug O₂ sensors on front and rear headpipes from motorcycle wire harnesses.
- 4. Remove the stock exhaust system being careful not to damage the headpipe gaskets. If the headpipe gaskets are in good condition they do not need to be removed from the cylinders. Remove and save the flanges, nuts, retaining rings and O₂ sensors from the stock exhaust.
- 5. Remove the stock exhaust mount bracket.
- 6. Install the supplied exhaust mount bracket using the stock bolts. See FIGURE 1. Tighten the bolts to factory specifications. If applicable, be sure to insert the large spacer between the exhaust mount and the transmission case as shown in FIGURE 1. For Switchback models, also insert 2 of the supplied small aluminum spacers into the large holes in the exhaust mount bracket as shown in FIGURE 2.

Instruction Manual > 6477B	Page 2 of 3
 Install the stock flanges, retaining rings and O₂ sensors onto the supplied front and rear headpipes. Install the front headpipe (with stock gasket in place) onto the front cylinder using the stock nuts but DO NOT TIGHTEN at this time. 	
 Position the supplied #27-61 MSC clamp with hex head facing the direction shown in FIGURE inlet of the collector on the rear headpipe. 	3 over the
10. Install the rear headpipe and collector assembly (with stock gasket in place) onto the rear cylin the lower collector inlet on to the front headpipe. Use the stock nuts to fasten the rear headpip cylinder but DO NOT TIGHTEN at this time. Make sure the front headpipe is pushed in as far into the inlet of the collector on the rear headpipe.	e to the
 Position the muffler clamp with hex head facing the direction shown in FIGURE 4 over the inle muffler. 	t of the
12. Slide the muffler onto the outlet of the rear headpipe and collector assembly until the holes in mount align with the exhaust bracket. Position the holes so they are in the center of the slots.	the muffler
 Secure the muffler assembly to the exhaust mount bracket using the (2) supplied 5/16"-18 bol NOT TIGHTEN. 	ts but DO
14. Make sure the muffler assembly, front headpipe, and rear headpipe are aligned properly and t following order; headpipe flanges to the cylinders (slowly tightening opposing nuts), front head muffler clamp, and finally the muffler assembly to the exhaust mount. (NOTE: The muffler clar headpipe clamp should be flush with the end of the inlets when tightened. See FIGURE 3 & 4 clamps are slid past the slots on the inlets the clamps will not tighten properly).	pipe clamp, np and
CLAMP SHOULD BE CLAMP	N 268-65MSC WITH HEX ACING DOWN
15. Plug the O_2 sensors back into motorcycle wire harnesses.	
16. Unscrew the small HS-24 clamps and feed the tail end of the clamp through the clips on the in heatshields. See FIGURE 5 for proper positioning of the clamps on the heatshields. (NOTE: T point to the positioning of the hex head of the clamps. The hex head of the clamps should be a tightening but not visible when the heatshields are mounted to the pipes.)	he arrows
17. Unscrew the larger HS-28 clamp and insert the tail end through the clip on the inside of the conheatshield. See FIGURE 5 for proper positioning of the clamps on the heatshields. (NOTE: The point to the positioning of the hex head of the clamps.)	
18. Install the rear heatshield first. Slide the bottom of the heatshield into position first and then slowly push the top of the heatshield into position. (NOTE: Spread the hose clamps apart slightly to make it easier to slide them over the muffler assembly and headpipes.) Snug the heatshield clamps but do not tighten. See FIGURE 5.	
19. Install the front heatshield the same way as the rear heat shield. See FIGURE 5 .
