

EXHAUST HEAT PROTECTION

Harley Davidson Pan America Heat Shield Kit 2021 and Up

Harley Davidson hit the mark with the new Pan-America Adventure Bike. While a great all-around bike, DEI saw some areas for improvement. Covering the exposed area of the Catalytic Converter will substantially reduce the heat near your foot and peg making for a more comfortable ride. With our exclusive DEI heat shield liner, we improve the factory rear cylinder heat shield while keeping the stock shield look. The catalytic converter shield is an OEM quality shield with premium insulation enclosed in 306 Stainless Steel. This type of shield is far more effective than conventional metal shields and will reduce heat more than 50%. The rear cylinder heat shield liner uses a combination of our Dura 2000 insulation and dimpled aluminum reducing heat more than 50%

Will not harm catalytic converter

Compatible with skid plates

Easy installation with no permanent modifications

Noticeable reduction of heat
