You are responsible for the proper installation of this seat on your motorcycle. Your attention to these installation instructions, any additional specific instructions and recommendations will permit the safe and proper use of this seat. You must mount this seat properly and securely before riding your motorcycle. If you lack the ability to safely and properly install this seat, seek out a qualified motorcycle technician for assistance. During installation, you may need to support the motorcycle with a suitable stand or lift so it will not tip over and injure you, or damage the vehicle. Using or mounting this seat improperly could result in a loss of control of the motorcycle which could result in damage to your motorcycle or other personal property, the property of third parties, and/or personal injury to yourself or others, up to and including death.

BE SURE TO THOROUGHLY READ AND CLOSELY FOLLOW THE MOUNTING INSTRUCTIONS THAT ARE INCLUDED WITH THIS SEAT.

- The seat must be installed and securely fastened onto the chassis of the motorcycle. Refer to your motorcycle's Owner's Manual and/or Service Manual for guidance.
- If you do not understand these instructions DO NOT mount the seat, and remove any seat related components you may have already installed on your motorcycle.
- Thoroughly inspect your motorcycle's seat before every ride. Do not use this seat if its mounting system has been modified, has deteriorated, loosened or is beginning to fail.
- Continually check the security of your seat and other accessories at each stop as you ride. Items attached to your motorcycle can loosen during operation, so be sure to check them frequently.
- Do not use this seat if you have any doubts as to whether it is properly mounted to your motorcycle. You must be sure that the installation of the seat will not damage your motorcycle's painted or plated parts. Saddlemen is not responsible if you or your technician mount the seat and it damages your motorcycle for any reason.
- When using any accessory, do not exceed your vehicle's Maximum Gross Vehicle Weight as listed on your motorcycle or in the manufacturer's owner's manual.
- If your seat is ever damaged, do not use it until it has been inspected by your local professional motorcycle dealer. You may also need to send your seat to Saddlemen for inspection or repair. Replace any mounting part immediately if it has sustained damage that will prevent the seat from being properly secured to your motorcycle.

PASSENGER GRAB STRAP: This accessory seat is provided without a passenger grab strap. Carrying a passenger without a grab strap in place on your motorcycle may be hazardous for the passenger. Grab straps, rear mounted foot pegs, sissy bars, passenger backrests and trunks aid in making a passenger more secure on the vehicle. Laws in some jurisdictions require grab straps or other security devices when a passenger is transported. Do not transport a passenger if they are not secure. Do not disable grab straps or other safety features provided on your motorcycle and obey all traffic laws while riding.

Saddlemen offers a complimentary grab strap for this seat, part no. 15327. Call (310) 638-1222 for more information. Always ride responsibly and take precautions to be sure your passenger is secure and comfortable at all times.

INSTALLATION:

1. Remove your stock seat. Your motorcycle will have two threaded studs coming up from the rear fender (see Fig A). You must remove the nuts from each of these studs prior to installing your new Saddlemen seat over the studs.
2. If you have a 2014 or later Touring model, you'll need to remove two metal frame bumpers (see Fig. B).
3. Looking at the underside of your Saddlemen Solo seat, locate the two mounting brackets installed on the bottom rear of the seat pan (Fig. C). Your seat's brackets may look different from the photo. In the front of the seat pan is a slot that will slide over a frame tab on your bike.
4. Locate the frame tab under the bike's gas tank, and slide the new seat forward, engaging the tab.
5. When the seat is in position, some solo seat styles require that you lift up on the rear foam portion of the seat (Fig. D) to install the new flange nuts that are included (Fig E). Confirm that the seat's two rear brackets go over the threaded studs on the fender (A). Screw the flange nuts onto the studs, with 10 -to- 15 ft/lbs torque recommended. Do not overtighten. This construction provides a clean look by covering the hardware.

INSTALLING A PASSENGER PILLION (optional)

Saddlemen passenger pillion seats will have two slotted brackets at the front of the pillion, that slide onto the two rear flange nuts of the front solo seat. With those two brackets in place, the rear single mounting tab can be installed into the original seat mounting point in the rear fender.

NOTE:

For additional paint protection, use a Saddlemen Adhesive Fender Washer (PN: 8901) and a Saddlemen Protective Tape Kit (PN: 4320-0807) which further protects paint from abrasion damage from a seat, and is also useful when mounting other accessories such as tank bags or saddlebags. NOTE: It is not considered abnormal for your new Saddlemen seat to touch the motorcycle's chassis in certain places (just like your original seat). Due to the natural variance of your vehicle and your new Saddlemen seat, you should always check to see if portions of the seat are touching painted or finished surfaces on your motorcycle. If the test fitting of your seat indicates an area where the seat is touching a sensitive surface, you can protect that area by using the Saddlemen Protective Tape Kit.

CAUTION:

It is your responsibility to make sure the seat installation does not create an unsafe or illegal situation. Remember that this seat is a custom accessory. It is your responsibility to check the installation to determine if it will be safe for you to operate the motorcycle and to properly and safely carry a passenger (this includes reinstalling the passenger grab strap or installing a suitable replacement). You must also ensure that the installation does not damage your vehicle in any way.

IMPORTANT:

After 50 miles (80 kilometers), recheck the seat's mounting to make sure it is still secure. Inspect all of your accessories and related hardware before and during each ride. An improperly mounted seat can interfere with the vehicle's operation and cause an unsafe riding condition.
